

DAN ABDULLAH USMAN

AI Product Engineer

Lagos, Nigeria (UTC+1) · Open to fully remote (any time zone), hybrid, onsite and relocation
uabdul88@gmail.com · +234 703 482 4573 · [linkedin.com/in/dan-usman-b87282134](https://www.linkedin.com/in/dan-usman-b87282134) · github.com/EmperorDa8 · Portfolio · xamio.app

SUMMARY

AI Product Engineer who takes products from idea to live release, usually in days. I build on the Claude, OpenAI and Gemini APIs and use Claude Code and Cursor as my core development workflow. I launched Xamio publicly on Product Hunt, shipped a live e-commerce platform for a UK client, and built multi-agent and RAG systems with schema-validated outputs and human review. A background in IT automation and Linux means I care about the parts demos skip: reliability, cost, security and what happens when the model is wrong.

SKILLS

AI & Agents: Claude API, OpenAI API, Gemini API, OpenRouter · tool calling, multi-agent orchestration, MCP · RAG and vector search · structured JSON outputs, guardrails, human-in-the-loop review · prompt engineering and evaluation
Full-Stack: TypeScript, JavaScript, Python · React, Next.js, Node.js, FastAPI · REST APIs, webhooks, OAuth · Chrome extensions (Manifest V3)
Data & Infra: PostgreSQL, Supabase · Docker, Linux, Google Cloud, Vercel · Stripe · Git and GitHub
AI-Native Workflow: Claude Code (primary), Cursor · PRD-first specs, CLAUDE.md context files, review at the diff and behaviour level

EXPERIENCE

Freelance AI Product Engineer Feb 2026 – Present
Remote · clients in the UK, US and Nigeria

- Mo2Production (UK client):** built and shipped a photo and print e-commerce platform solo in under two weeks: 5 product configurators, a server-side pricing engine, an AI passport-photo compliance checker, Stripe checkout and an admin back office (Next.js, TypeScript, Supabase). Live in production.
- Contract Review Triage:** built a RAG system on the Claude API that bands contract risk Green / Amber / Red with clause-level citations and routes low-confidence results to a human reviewer instead of failing silently.
- Trade Finance Automation (prototype):** designed a 9-agent system across a 5-phase trade-deal lifecycle (extraction, classification, business-rule validation, summarisation) with strict JSON schemas at every agent boundary and human approval gates. Learned the domain from scratch and demoed it to the client.
- Delivered documented GitHub repositories and handover notes under milestone-based agreements, explaining trade-offs to non-technical clients in plain language.

AI Prompt Engineer Intern · AZER-T Sep 2025 – Jan 2026
Remote · game studio, France

- Built prompt-driven pipelines for game art, marketing assets and 3D models, cutting per-asset outsourcing cost by ~30% and iteration time by ~40%.
- Set up ElevenLabs voices for 3 in-game NPC characters with consistent character voices; shipped 10+ marketing assets on deadline.
- Created reusable prompt templates so teammates could produce on-brand assets without help.

PRODUCTS (LIVE)

Xamio · Founder and solo builder **PRODUCT HUNT LAUNCH** xamio.app
Upload any exam timetable (PDF, image, spreadsheet or Word) and AI extracts every exam, matches it to the student's registered courses and syncs it to Google Calendar with email reminders. Owned the whole product: UX, extraction pipeline, Google OAuth, launch and user support (React, FastAPI, Supabase).

Tasker · privacy-first Chrome extension tasker-landing-liard.vercel.app
Turns browsing time into shareable daily and monthly PDF reports, with optional Google Drive backup. No account; data stays on the device.

aitrainingplan.app · AI adoption planner aitrainingplan-chi.vercel.app
Generates a concrete 4-week AI adoption plan for a team from its role and size.

VentureScout · LLM startup risk scoring venuturescout.lovable.app
Scores early-stage startup risk with a structured LLM rubric; idea to live MVP in about 9 days.

Agentic X Bot · autonomous social agent github.com/EmperorDa8/agentic-x-bot
Always-on AI agent that replies on X in a brand's own voice, grounded in the brand's website content.

EDUCATION & CERTIFICATIONS

BSc Computer Science · National Open University of Nigeria · 2021 – 2024
AI Fluency for Builders · Anthropic × CodePath
Google IT Automation with Python | Google Generative AI Studio
